

# BADU®Logic

Saltwater chlorinators  
Soutwater chloorineerders

BADU®Logic

## FEATURES

- Low maintenance and easy to operate.
- Clear housing for quick electrode inspection.
- Self cleaning efficiency on electrodes for life.
- Cutting edge cell design so that electrodes do not erode.
- Fully factory tested.
- Available in 4 sizes to suit all pool applications.
- 12 month ex-factory warranty under normal operating conditions from date of purchase.

## Code / Kode

8500000050  
8500000075  
8500000100  
8500000150

## Description / Beskrywing

BADU®Logic 50  
BADU®Logic 75  
BADU®Logic 100  
BADU®Logic 150

## Technical data / Tegniese data

Salt level  
Chlorine output / hour at 100%

Minimum Flow rate  
Maximum salt level

Max. Water temperature (°C) 35  
Max. Operating pressure (bar) 4

Why use the BADU®Logic range of self cleaning saltwater chlorinators? Quite simply, salt water chlorination is the healthy alternative to chlorinate your swimming pool; the natural way. Fitting a BADU®Logic salt chlorinator will transform your pool into a lifestyle asset, ensuring soft, crystal clear water without the red eyes and without dry itchy skin.

The BADU®Logic range of self cleaning chlorinators is low maintenance and even lower operating costs compared to other chlorination methods and create more eco-friendly backwash water while still maintaining high levels of chlorine efficiency.

The BADU®Logic range of self cleaning salt chlorinators is manufactured to the highest ISO standards and carries the CE mark of approval.

Waarom gebruik die BADU®Logic reeks van self skoonmaak soutwater chloorineerders? Heel eenvoudig, sout water chloor is die gesonde alternatief om jou swembad te chloorineer, die natuurlike manier. Om 'n BADU®Logic sout chloorineerder te installeer sal jou swembad omskep in 'n leefstyl bate en dit sal sorg vir sagte, kristal helder water sonder die rooi oë en sonder 'n droë, jeukerige vel.

Die BADU®Logic reeks van self skoonmaak chloorineerders se instandhouding is minimaal en nog laer bedryfskoste in vergelyking met ander chlorineringsmetodes en skep meer ekovriendelike terugspoel water terwyl dit steeds doeltreffende hoë vlakke van chloor handhaaf.

Die BADU®Logic reeks van self skoonmaak sout chloorineerders is vervaardig met die hoogste ISO-standaarde en dra ook die CE-merk van goedkeuring weg.

## EIENSKAPPE

- Lae instandhouding en maklik om te gebruik.
- Deursigtige behuising vir 'n vinnige elektrode inspeksie.
- Self-schoonmaak Lewenslange doeltreffendheid op die Selfskoonmaak elektrodes.
- Voortreflike sel ontwerp sodat elektrodes nie verweer nie.
- Volledig fabriek getoets.
- Beskikbaar in 4 groottes vir verskillende swembadaanwendings.
- 12 maande fabriekswaarborg onder normale werktoestande vanaf datum van aankoop.

## Voltage / Spanningstrek

220 V, 0.15 – 0.44 amp draw  
220 V, 0.15 – 0.44 amp draw  
220 V, 0.15 – 0.44 amp draw  
220 V, 0.15 – 0.44 amp draw

## Specifications (all models) / Spesifikasies (alle modelle)

5 g/L (Optimum)  
BADU®Logic 50: 10 g/h  
BADU®Logic 75: 20 g/h  
BADU®Logic 100: 20 g/h  
BADU®Logic 150: 30 g/h  
83 L/min or 5000 L/h  
13 000 ppm
